

We have been providing our clients peace of mind for over ten years with our unprecedented approach to home maintenance.

We know there are other products on the market that offer “other warranty options” at almost three times the cost with half the benefits. We take our knowledge and back it up with state licensed inspectors, a 24 month workmanship warranty, a maintenance program and our ten year track record of maintaining homes like yours.

Comparisons	Warranty	Maintenance Program	Quality Control Inspection	Full 24 Month Inspection
The Extended Warranty and Maintenance Program	Yes	Yes	Yes	Yes
Others	Yes	No	No	No

Extended Warranty & Maintenance Program

Your home will be inspected by one of the qualified inspectors at:

dryvitinspections.com

The inspectors listed at dryvitinspections are state licensed home inspectors that have extensive knowledge in EIFS and Stucco.

They will **inspect** your home according to the current standards and provide a detailed report on the condition of the EIFS, Sealants, Flashing and Windows on your home.

Based on the inspectors findings, we will review the report and your home for the best **repair** recommendations .

Once we perform the repairs the inspector re-inspects your home to verify the completeness and quality of the work.

Our program provides you with peace of mind and not just in the form of a warranty. It gives you a quality control inspection after repairs are performed, a full re-inspect at 24 months and a maintenance program.

Once the inspector acknowledges the work was completed in a professional manner your home is then issued a 24 month workmanship warranty and entered into our **maintenance** program.

Prior to the end of your maintenance program your home will be re-inspected and another report generated.

Based on that report maintenance items like sealant touch ups, crack repair and other items will be repaired. Your home can then be re-entered into the program for continued coverage.

This program is designed to take apprehension out of owning an EIFS or Stucco home and let you enjoy one of the most energy efficient exterior claddings available today as noted by the US Department of Energy.
